Rebeca Morales, PhD.
General Coordinator "Doctorado Interinstitucional de Ciencias Biomédicas"
Universidad Juárez del Estado de Durango (UJED)

Ref: Daniel Ramos Rosales

Dear Prof Morales,

This is to attest that Daniel Ramos Rosales completed a research placement in my lab from September 15, 2018 to January 15, 2019. During his stay, he learned ChIP-qPCR techniques as they are applied to investigate post-mortem brain samples. He was exposed to a number of different functional genomic projects going on in my laboratory that investigate epigenetic processes in suicidal behavior and depression. Daniel was diligent during all his stay with us.

Sincerely,

Gustavo Turecki, MD, PhD
